

Corporate Medical Apparel Catalogue

B2B bulk manufacturing solutions for hospitals, clinics, laboratories and healthcare institutions.

Some brands begin with an idea. Ours began with experience.

SULUN MEDICAL was founded on the knowledge, commitment to quality and dedication of a family with many years of experience in medical textile manufacturing.

As the next generation, we combine this manufacturing heritage with a modern brand vision. We approach the needs of hospitals, clinics, laboratories and healthcare institutions not simply as products, but as corporate projects that bring together garment design, fabric, size allocation and production planning.

Trust, quality, experience and partnership

01

Trust

A project process built on open communication and mutual approval.

02

Quality

A consistent manufacturing approach, from fabric to final inspection.

03

Experience

Textile experience combined with a next-generation brand vision.

04

Partnership

Planning around the organisation's work environment and team structure.

A business model focused on corporate bulk manufacturing

Hospitals and healthcare groups

Private clinics and medical centres

Laboratories

Universities and healthcare education institutions

Institutional healthcare suppliers

Wholesale distributors and project partners

8 product groups, options tailored to your organisation

Screen colours are a guide; physical swatches are definitive.

Digital colour samples are representative. Screen settings, ambient light and production batches may affect colour appearance. Specify the fabric range and colour code when requesting a quotation; the final colour is approved using physical fabric swatches before production.

The current fabric colour codes and options are published in an updatable format at sulunmedical.com/kumaslar.

A controlled process from requirements to delivery

01 **Requirements analysis and design planning**

02 **Fabric and accessory selection**

03 **Sampling, fitting and measurement checks**

04 **Bulk production and in-process quality checks**

05 **Final inspection, packing and delivery**

The same professional standard in every product

Fabric and accessories

Assessment based on the work environment and project requirements.

Sizing and design

Monitoring approved details throughout sampling and bulk production.

Stitching details

Workmanship suited to the product's intended use.

Final inspection

Order checks before packing and preparation for delivery.

Information to prepare before requesting a quotation

- 1 **Company and contact person details**
- 2 **Product of interest or product code**
- 3 **Estimated total order quantity**
- 4 **Women's/men's styles and size breakdown**
- 5 **Preferred fabric range and colour code**
- 6 **Corporate logo, embroidery or name application**
- 7 **Requested delivery date and destination city**

Minimum order quantities range from 250 to 500 units depending on the product and project scope. Lead time depends on fabric, design, order quantity and production planning.

Let's plan the right solution for your organisation.
